SUMMARY

Computer Engineer with **8 years** of experience as an **Oracle Developer** and **5 years** managing data processes for SMEs. Proven **project leader** with a focus on **ETL development** and data quality analysis. Skilled in **Informatica**, **SQL**, and **Python**, demonstrating strong teamwork and commitment to delivering results. Adept at understanding business requirements and implementing effective solutions, making him a valuable asset in any technical team.

PROFESSIONAL EXPERIENCE

Software Engineer – Softtek | CDMX, Mexico

Nov. 2023 - Present

As a Software Engineer at Softtek, I am currently involved in the development and maintenance of Oracle applications, focusing on process analysis and updating code to align with business rules. My role requires close collaboration with stakeholders to ensure that the software meets the operational needs of the organization.

- Process Analysis for business applications.
- Updating and optimizing existing code for compliance with business rules.

Tools/Skills: Forms 12c, Reports 12c

Process Developer – Citibanamex | CDMX, Mexico

In my role as a Process Developer for Informatica Data Quality at Citibanamex, I was responsible for analyzing data quality processes related to data migrations from the S16 system to MDM processes. This involved direct communication with clients to gather requirements and ensure that the solutions provided met their needs.

- Conducted data quality process analysis for migrations.
- Created IDQ Maps to facilitate data quality checks.
- Engaged directly with clients to clarify requirements.
- Monitored project progress using AGILE methodologies.

Tools/Skills: Informatica Developer 10.5.4, Oracle SQL, PL/SQL

Project Leader – Grupo Salinas | CDMX, Mexico

Oct. 2019 - Nov. 2023

As a Project Leader at Grupo Salinas, I led projects focused on information extraction and process automation. My responsibilities included overseeing the Informatica PowerCenter area, managing ETL flows, and ensuring that best practices were implemented across the team.

- Led projects in information extraction for process automation.

EDUCATION AND TRAINING

Centro Universitario Valle de México UAEM

Bachelor's Degree in Computer Engineering

February 2005 - July 2010

CERTIFICATIONS

Scrum Fundamentals, CDMX, Mexico, September 2023 - November 2023

Professional Scrum Course, CDMX, Mexico, March 2022 - June 2022

Python, CDMX, Mexico, January 2018 - May 2018

ABInitio, CDMX, Mexico, February 2024 - April 2024

IICS Informatica, CDMX, Mexico, December 2023 - January 2024

- Administered Informatica PowerCenter for both development and production environments.
- Developed ETL flows for data analysis and alert creation.
- Managed IPC Console for operational support.
- Collaborated continuously with multiple teams.

Tools/Skills: Informatica PowerCenter 10.5.2, Powershell, AS/400 DB, SQL Developer, PL/SQL, Python, MS SQL, Power BI

ABAP Developer – Praxis - Scribe | CDMX, Mexico
Oct. 2018 - Oct. 2019

In my position as an ABAP Developer, I was involved in the implementation of the WM module in Scribe. My role included generating Smartforms and Z-programs to enhance production line operations.

- Created Smartforms for UDM control and management.
- Developed Z-programs to support production operations.
- Configured and maintained handheld devices for the WM module.

Tools/Skills: Scrum, ABAP

Oracle Developer – Edilar | CDMX, Mexico
Oct. 2013 - Sep. 2018

As an Oracle Developer, I was responsible for the support, maintenance, and development of in-house ERP modules based on Oracle Forms. This included managing various ERP areas such as Accounting and Customer Service.

- Supported and maintained ERP modules based on Oracle Forms.
- Controlled dedicated ERP areas including Accounting and Management.
- Generated web modules to enhance Forms functionality.
- Conducted requirements surveys and managed projects.

Tools/Skills: Oracle Forms/Reports, Python, JavaScript, SQL Developer, PL/SQL
